## SANI-SPRAYER SUPERFICI

Pneumatic equipment for atomizing sanitizing, sanitizing, ineffective liquids, etc. it is equipped with a special lance and is ideal for spraying on surfaces, work surfaces, shelves, stored goods, pallets of incoming and outgoing goods, etc.

By actuating the lance, the product is sprayed and finely atomized to obtain a "dry mist". By directing the jet of the lance, it is possible to reach any point on the surface to be treated, even the most hidden corners.

SANI-SPRAYER is equipped with a pressure regulator and a metering valve which allow to regulate the atomization, allowing to obtain a more or less dry mist.

Made of AISI 304 stainless steel, SAN SPRAY SURFACES! Is available in two models; with 14 L tank (mod. SPXL / 14) and with 24 L tank (mod. SPXU24).

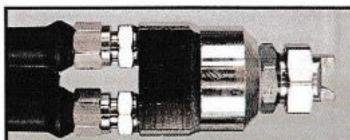

**SPXL/24**

### **SURGERY:**

- put the product in the tank
- connect the tank to compressed air
- adjust the air pressure (max 1 bar)
- open the air tap
- open the liquid tap
- adjust the liquid flow
- activate the lance by directing the jet towards the surface to be treated

**CAUTION:** before inserting the chemical, always check its compatibility with the materials with which SANI-SPRAYER is made.

### **TECHNICAL DATA:**

- lance length 65 cm
- double spiral hose 10 m
- atomizing nozzle
- maximum pressure 8 bar
- regulation valve of the liquid flow rate
- pressure regulator
